

# TOP 5 REASONS

## Why Epson Inkjet Printers Are Amazing for Business

Only Epson takes its commercial-grade PrecisionCore® inkjet technology and brings it to everyday business color printing for unrivaled, hassle-free performance.

### Only Epson Business Inkjet Can Give You:

1

#### Innovative industrial printing technology

Epson's award-winning commercial-grade inkjet technology, PrecisionCore®, is built into its family of business-class inkjets. The unique MicroPiezo® ceramic printhead delivers both speed and professional-quality output.

2

#### Lowest-cost color printing in its class

The WF-C869R has the lowest color printing cost in its class,<sup>1</sup> and its Replaceable Inkpack System delivers up to 84,000 ISO pages before changing the ink packs, which means fewer interventions and less hassle.<sup>2</sup>

3

#### Unbeatable speeds without compromised quality

The WF-C20590 has print speeds of up to 100 ISO pages per minute<sup>3</sup> (fastest in class)<sup>4</sup> so a high volume of work gets done very quickly. It's what's inside that counts; the PrecisionCore® technology delivers breakthrough speed and professional-quality output on a wide variety of specialty media, as well as plain paper.

4

#### Hassle-free printing and serviceability

Inkjet technology is less complex than laser technology, with fewer serviceable parts for lower maintenance.<sup>5</sup> Epson inkjet printers are designed for high reliability and optimally designed for business applications.

5

#### Up to 50% less power

The WorkForce Enterprise WF-C20590 color MFP utilizes up to 50% less power than color lasers.<sup>6</sup>
